Oral Presentation (20% of the final mark – to be graded by supervisors and Course Coordinators in attendance at the presentation):

The Oral Presentation should be presented at a level that any scientifically literate person will have a basic understanding of the research undertaken. The Oral Presentation must be a **10-minute** PowerPoint (or equivalent) presentation to Scholar's Electives 2200E and 3305E peers, supervisors and Course Coordinators, followed by a 5-minute question period. The presentation should include background and rationale for undertaking the study, hypothesis, experimental methods, a synopsis of the data and an interpretation of the results, a summary of the

findings and conclusions, suggestions for future experiments, and acknowledgements.

The following characteristics will be assessed:

1. Did the presentation include an introductory slide and an acknowledgement slide, outline the topic of the literature review, and include background information on the topic being researched?
2. Was the rationale and hypothesis for the study clearly stated?
3. Were the methods presented clearly and with sufficient detail?
4. Were the results or anticipated results clearly described with appropriate figures?
5. Was the significance of the results/anticipated results clearly discussed and placed into perspective with the background and hypothesis?
6. Was there forethought regarding the potential extension/expansion of the research for the future?
7. Were the slides clear, attractive, organized and uncluttered?
8. Was the speaker's voice clear and enthusiastic?
9. Was the response to questions insightful and demonstrative of a clear knowledge of the project?
10. Was the length of the presentation appropriate?
